Myth # 1

Industrial IoT is only for
**manufacturing or industries. How
does it affect me, today?**

Myth # 2

Industrial IoT is just **an optional add on with little immediate value.**

Myth # 3

Industrial IoT implementation is
capital intensive.

Myth # 4

Industrial IoT **means worrying about connectivity and security?**

Myth # 5

Industrial IoT **means deploying robots. What will happen to good old human touch?**
